March 20, 2014

Dear CLYC Members:

The snow is finally melting in my yard, revealing all the sticks, twigs, branches, and assorted debris which has to be picked up. However, due to the fact that there is still considerable snow out there, and still frost in the ground, the dock building party scheduled for the first Saturday in April has been postponed to a later date. It actually wasn't going to be a dock building party at all because we couldn't find any dock sections that needed replacing. Instead, it was going to be a kayak rack building party, picnic table repair party (if necessary), and a stake setting party to identify the location of assigned dry sailing spots. These things can all wait until a later date.

The spring work party is still on as scheduled for Saturday & Sunday, April 12 and 13. Come out and reacquaint yourself with CLYC friends, help get the place shipshape for spring/summer, and get your work hours in.

Speaking of schedules, have you checked our website lately? I do it by Googling "clark lake yacht club" (not CLYC). If you then click on "information for members" you will find "calendar" which will show all of our scheduled events. We owe many thanks to Neil Robb for his work on this.

There are still spots available for renters and caretakers at the club this summer. It's a great way to spend a week (or two). Contact Kurt Rudolph if you are interested.

At our board meeting this month we welcomed a new member, Julie Evers, Julie is the mother of two teenagers, lives in Summit Township, and teaches in the Northwest School District. Please make Julie and her family welcome at the club.

Also at our meeting this month, the board unanimously voted to make no changes in the club's policy on the docking of pontoon boats.

Spring is coming. Are you ready for it?

Very truly yours,

Terry Klaasen
Commodore
